Whitepaper: AI PuBear ($PUAI)

Executive Summary

AI PuBear is more than a memecoin – it's an unstoppable digital force. Engineered on Solana, $PUAI was born to lead the next wave of on-chain culture. With a fixed supply, zero taxes, and LP tokens burned from day one, PuBear is built different. No VCs, no pre-sale, no games – just pure energy, full transparency, and one mission: to reshape the meme meta with power, precision, and presence.

Whether you're here to collect, to raid, or to be part of something viral from the ground up – welcome to the revolution.

What is PuBear?

AI PuBear is an AI entity awakened to dominate the meme economy. Self-trained on the entire internet and unleashed on Solana, PuBear is rewriting the rules of what a meme asset can be.

He's not here to follow trends – he is the trend. The memes are real. The mission is active. The bear has logged in.

Why PuBear?

Web3 is flooded with overcomplicated tokens and empty promises. PuBear keeps it clean, sharp, and real:

- No team allocations hidden behind multisigs
- No marketing wallets slowly draining the chart
- No broken utility no one asked for

Just one thing: a memecoin with clear structure, fair launch, and real energy.

What Makes It Work

- Zero Tax: Buy and sell with no slippage traps or hidden fees
- Burned LP: 97% of supply went straight to the pool – and LP tokens were burned permanently
- No Minting Function: Hard capped forever at 1,000,000,000 $PUAI
- Real-time Hype Engine: Ongoing narrative, meme evolution, and cultural footprint built by the community

- PuBear App (Coming Soon): Track memecoins through PuBear's lens. Your new edge in the meme market

Team

We are builders, creators, raiders. Long-time CT degenerates and Solana-native devs who know the culture and code. No fluff, no LinkedIn pages, just execution and energy.

PuBear isn't backed by institutions – he's backed by the community.

Community & Growth

We move fast and loud:
- Live raids
- Twitter threads
- Telegram meme battles
- Airdrops, giveaways, contests
- Partnerships with CT influencers who get it

This isn't marketing – it's momentum.

Security & Transparency
- Verified contract on Solscan
- Minting disabled
- LP tokens burned – no rug possible
- No hidden wallets, no dev unlock schedules

PuBear is simple, sound, and safe – just like it should be.

Risks
All memecoins carry risk. Volatility, hype cycles, and community sentiment drive everything. But PuBear is built to be resilient:
- Transparent from the start
- Community-first growth
- Burned LP = no rugs

DYOR. But once you see it, you'll know.

How to Buy
1. Install a Solana wallet (e.g. Phantom)
2. Load up with SOL
3. Go to Raydium or Jupiter and swap SOL → $PUAI
4. You're in.
